SL600 (Black) - Digital Cameras

12.2MP Digital Camera

Capture More Of Your Life
When it comes to brightness, it’s brilliant
Just what you had in mind
VGA quality video. Now in a compact camera

The SL600 has everything you need in one compact camera. 12.2 megapixels give you the power to capture memories with beautiful details. And with a 5x optical zoom, it’s easy to get close to your subjects. Worried that photos might be less than perfect? The SL600 includes the Samsung Perfect Portrait System which automatically retouches facial imperfections, selects the right scene mode and more. Make every shot a beauty, with the SL600 digital camera.

Capture More Of Your Life

You already have the eye. Now all you need is the camera to capture the world exactly the way you see it. The SL600 combines a 27mm ultra wide angle lens with a 5x zoom. Letting you can fit more in frame while delivering a deeper perspective. And the 12.2 mega pixels provides the sharp, crisp detail to reveal all kinds of things. Including what a great photographer you are.

When it comes to brightness, it’s brilliant

When we engineered the Samsung SL600 to be bright, we meant it in both senses of the word. It’s intelligent and luminous, both. It has a 2.7” LCD for improved contrast and color reproduction, which allows you to enjoy a wider and clearer image. And its Intelligent LCD brightness automatically detects environmental illumination and adjusts the LCD brightness for optimal image viewing. It does the thinking for you, which makes the SL600 a smart choice.

Just what you had in mind

You see the image you want in your head. You point the SL600. And Smart Auto sees it too. This scene recognition technology actually chooses from 16 different settings ranging from landscape to portrait automatically. Then adjusts for the perfect shot. Whether it's catching your friends on a night on the town or a waterfall off a mountain. What you get is exactly what you had in mind. Plus all the credit.

VGA quality video. Now in a compact camera

If you prefer still shots to movies but want to leave your options open the SL600 is right for you. You'll get 640x480 quality video at 30 frames per second. You even can use the 5x optical zoom to get up close and vividly personal. And when things get dicey, you can even pause your recording. You'll give up nothing, except carrying around that extra camera.

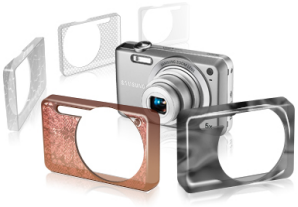
The camera loves you

No one has a bad side with SL600's Perfect Portrait system. Sure it fixes red-eye, but this next generation face detection technology even detects blinking. So you're always sure eyes are open and smiles are bright. In addition it evens skin tones, erases blemishes and removes dark circles. And with different level settings, you can control how much retouching you do. Not that your friends and family need any.

Lost. And then found

Say you've got about 2,000 photos stored on your SL600 and you're looking for one in particular. You could flip through all 2000 or have the Smart Album feature do it for you. It will search and find photos just the way you want. Go straight to that shot you took whether it was last week or last Friday. You can search by color tone, or even by file type. So no matter how many memories you have crammed onto your memory card, getting directly to the one you want is a no brainer.

Protects with style



The Samsung SL600 comes with an Anti-scratch Mask that protects the surface of your camera from scratches while also giving you a unique look and style that stands out from the crowd. And with improved comfort and grip, the SL600 will fit more securely in your hands. Durability, design, and comfort - brought to you by Samsung Digital Cameras.

Aluminum Cover

The Samsung SL600 is light and portable yet durable with an aluminum metal body. The aluminum metal exterior enhances durability and protects the camera from outside forces. The SL600 boasts stylish and luxurious design in your choice of five different colors.

Digital Image Stabilization (DIS)

Even the tiniest shake can ruin your shot. The SL600’s Digital Image Stabilization solves that. Digital Image Stabilization gives you sharp images no matter the condition. Whether it’s low light, zooming or just a case of plain old shaky hands, your photos come out sharp and clear. So let the SL600 shake things up. In a good way.
